

SIVAPERUMAN E

MERN Stack Developer | Frontend Engineer | React.js | Next.js | TypeScript | Node.js | AWS | Docker

Chennai, Tamil Nadu 600041 | +91 8072107491 | sivaperuman744@gmail.com

PROFESSIONAL SUMMARY

Frontend & MERN Stack Developer with **4+ Years of Experience** architecting scalable web applications, responsive user interfaces, and modular backend APIs. Highly skilled in React.js, Next.js, TypeScript, Material UI (MUI), Zustand, Node.js, Express.js, and MongoDB. Experienced in containerizing applications with Docker, deploying resilient cloud workloads on AWS, and automating end-to-end CI/CD pipelines via GitHub Actions across Enterprise Management, Logistics, and Agritech domains. Immediately available to join.

TECHNICAL EXPERTISE

Frontend Web:	React.js, Next.js, TypeScript, JavaScript (ES6+), React Hooks, HTML5, CSS3, Bootstrap, Vite
UI & Design Systems:	Material UI (MUI), PrimeReact, Tailwind CSS, SCSS Modules, Storybook, Responsive Design
Backend & MERN:	Node.js, Express.js, MongoDB, Mongoose, PostgreSQL, REST APIs, JWT, WebSocket (Socket.IO)
DevOps & Cloud:	Docker (Multi-Stage Builds), AWS (EC2, S3), CI/CD (GitHub Actions), Nginx, Git, GitHub
State & Validation:	Zustand, Context API, Axios, React Router, Formik, React Hook Form, Yup, Zod, Jest, Postman

PROFESSIONAL EXPERIENCE

Frontend Engineer & MERN Stack Developer

2022 – Sep 2026

Thinkinfinit Technology and Consulting Pvt Ltd

Enterprise Inventory & Operations Management System (Enterprise Logistics Domain)

- Engineered modern, responsive frontend modules using React.js, TypeScript, Vite, and Material UI for inventory tracking and operational workflows.
- Constructed multi-stage Docker containerization with Nginx production serving, minimizing container image footprint and runtime overhead.
- Architected and implemented automated CI/CD pipelines using GitHub Actions for continuous linting, building, and zero-downtime deployment to AWS.
- Integrated secure REST APIs with Node.js and Express.js, ensuring optimized payload delivery and real-time state synchronization with Zustand.

Order & Warehouse Management Platform (Logistics Domain)

- Developed responsive React.js/Next.js dashboards and workflow modules for managing purchase orders, shipments, tax calculations, and invoice processing.
- Implemented strict client-side validation using React Hook Form and Zod schemas, securing form workflows and minimizing payload errors.
- Integrated secure role-based access control (RBAC) across administrative and operational views utilizing JWT authorization.

Global Operations & Field Workforce Platform (Agritech Domain)

- Built the central administrative command center dashboard to manage global partnerships, subscription billing, and operations.
- Developed a role-based, mobile-friendly operational interface tailored for field personnel and farmers handling ground operations.
- Engineered multi-step form workflows with Formik, Yup schema validation, and Zustand global state management.

Agricultural Supply & Inventory System (Agri-Commerce Domain)

- Built a modular frontend architecture for tracking agri-inputs, financial ledgers, nursery management, and post-harvest inventories.
- Wrote comprehensive unit tests using Jest to validate key utility functions and critical user interface workflows.

Enterprise UI Design System & Shared Component Library

- Authored and maintained a shared Storybook component library, standardizing UI patterns and accelerating feature delivery across development teams.
- Constructed isolated component stories with PrimeReact and SCSS to support a scalable, maintainable design system.

STATIC WEBSITE PROJECTS

Corporate Business Solutions Website

- Developed and maintained the official corporate website to showcase enterprise consulting services, career opportunities, and business solutions.
- Optimized site layouts for cross-device responsiveness, ensuring high accessibility, seamless navigation, and search visibility.

PERSONAL PROJECTS & POCS

Student Management System (React.js, MUI, Zustand, Node.js, Express, MongoDB)

- Built a full-stack MERN CRUD platform tracking student records with dynamic data visualizations via MUI Data Grids.
- Engineered MongoDB schema models and integrated RESTful endpoints with Express.js for efficient data processing.

Real-Time Chat Application (React.js, TypeScript, Tailwind CSS, Socket.IO, Node.js)

- Engineered a bi-directional communication service using WebSockets for instant message exchange and reactive updates.

Authentication & User Management API (Node.js, Express.js, TypeScript, PostgreSQL, JWT, Swagger)

- Designed a secure backend REST service featuring JWT authentication, role-based authorization, and automated OpenAPI documentation.

EDUCATION

B.E. in Computer Science and Engineering

2018 – 2022

DMI College of Engineering

LANGUAGES

English, Tamil
